

<ol style="list-style-type: none"> <li>1. Logon to your vCenter server.</li> <li>2. Browse to the VM that needs the VMware tools to be updated.</li> </ol>	
<ol style="list-style-type: none"> <li>3. Open the VM Server Console.</li> <li>4. Logon to the server that needs updating.</li> <li>5. Click 'VM'.</li> <li>6. Click 'Install/Upgrade VMware Tools'.</li> </ol>	
<ol style="list-style-type: none"> <li>7. Choose Interactive Tools Upgrade.</li> <li>8. Click OK.</li> </ol>	

<p>9. Click 'Next'.</p>	 <p>The screenshot shows the 'VMware Tools Setup' window. The title bar reads 'VMware Tools Setup'. The main content area has a blue header with the VMware logo and the text 'Welcome to the installation wizard for VMware Tools'. Below this, it says 'The installation wizard will install VMware Tools on your computer. To continue, click Next.' At the bottom right, there is a warning: 'WARNING: This program is protected by copyright law and international treaties.' At the bottom of the window, there are three buttons: '&lt; Back', 'Next &gt;', and 'Cancel'.</p>
<p>10. Auto run doesn't always run, browse to the DVD-ROM drive and double-click the SETUP file.</p> <p>11. Choose applicable installation (Complete).</p> <p>12. Click 'Next'.</p>	 <p>The screenshot shows the 'VMware Tools Setup' window at the 'Choose Setup Type' screen. The title bar reads 'VMware Tools Setup'. The main content area has a blue header with the VMware logo and the text 'Choose Setup Type' and 'Choose the setup type that best suits your needs'. Below this, it says 'Please select a setup type.' There are three radio button options: 'Typical' (with a description: 'Installs the program features used by this VMware product only. Select this option if you intend to run this virtual machine only with this VMware product.'), 'Complete' (which is selected, with a description: 'Installs all program features. Select this option if you intend to run this virtual machine on multiple VMware products.'), and 'Custom' (with a description: 'Lets you choose which program features to install and where to install them. Only advanced users should select this option.'). At the bottom of the window, there are three buttons: '&lt; Back', 'Next &gt;', and 'Cancel'.</p>

<p>13. Click 'Install'.</p>	
<p>14. Click 'OK'.</p>	
<p>15. Click 'OK'.</p>	

<p>16. Click 'Finish'.</p>	 <p>The screenshot shows a window titled "VMware Tools Setup". The main content area displays the text "Completed the VMware Tools Setup Wizard" and "Click the Finish button to exit the Setup Wizard." At the bottom of the window, there are three buttons: "&lt; Back", "Finish", and "Cancel". The VMware logo is visible in the bottom left corner of the window's content area.</p>
<p>17. Click 'Yes' to reboot immediately.</p> <p>18. Click 'No' to reboot later.</p>	 <p>The screenshot shows a dialog box titled "VMware Tools Setup" with a close button (X) in the top right corner. The dialog contains an information icon (i) and the text: "In order to complete the installation of VMware Tools, you must restart the computer. Other users are currently logged on to this computer, and restarting may cause them to lose their work. Do you want to restart now?" At the bottom of the dialog, there are two buttons: "Yes" and "No".</p>
<p style="text-align: center;"><b>Reboot can be postponed, but is not recommended!</b></p> <p style="text-align: center;"><b>A reboot is required when remediating Virtual Machines. Be sure to coordinate the necessary downtime.</b></p>
